**MASTER PLAN - INFRASTRUCTURE AND TRAIL CONNECTIONS**

**HISTORY OF THE KAW TRIBE**

The presence of the river along the site serves as an undeniably important aspect of Manhattan’s current development scenario, which have an opportunity to redress the presence of historical significance and impact on the surrounding areas.

**KAW-PAWHEE MEMORIAL BRIDGE**

The bridge serves as an exploration of cultural identity and Indigenous vernacular architectural forms in a site context that reflects the Kaw Tribe’s history and the significance of the river in a public way.

**RIVERFRONT BOARDWALK AND TRAIL**

**FRONT VIEW**

The development’s role is to provide information about developing infrastructures and community projects. This includes a new, adaptive, resilient, and sustainable system beginning with the infrastructure of the river and continuing into the future.

**DEVELOPMENT COMPLEX PROPOSAL - RENDERED CONCEPT**

**AXONOMETRIC DEVELOPMENT SCHEME**

**LAYERING AND CONNECTING INFRASTRUCTURE IN MANHATTAN, KS**

**CONVERGE**

**PROJECT VISION**

Addressing the issues of affordable housing, economic development, transportation, and sustainability, the project proposes a mixed-use development that includes a variety of uses, including residential, commercial, and community spaces. The project aims to create a vibrant, accessible, and sustainable community that reflects the history and culture of the area.

**ECONOMIC DEVELOPMENT**

The project strives to create economic development opportunities by integrating affordable housing, commercial spaces, and community amenities into the overall development plan. This will not only enhance the quality of life for residents but also contribute to the local economy by attracting businesses and creating job opportunities.

**CULTURAL SIGNIFICANCE**

The project is designed to respect and preserve the cultural heritage of the area, ensuring that the development integrates with the surrounding landscape and respects the historical context of the site.

**SUSTAINABILITY**

The project prioritizes sustainability by incorporating green spaces, renewable energy sources, and energy-efficient designs. This will contribute to reduced environmental impact and promote public health and well-being.

**EARTH ECOLOGY**

The project is situated in a natural environment, surrounded by open spaces and greenery. The design aims to minimize the impact on the natural landscape and create a harmonious coexistence between nature and development.

**SUSTAINABLE URBANIZATION**

The project promotes sustainable urbanization by integrating green infrastructure, stormwater management, and sustainable transportation options to create a resilient and adaptable urban environment.
